

Applied Biosystems

Applied Biosystems serves the life science industry and research community by developing and marketing instrument-based systems, consumables, software, and services. Customers use these tools to analyze nucleic acids (DNA and RNA), small molecules, and proteins to make scientific discoveries and develop new pharmaceuticals.

Basic research supported by Applied Biosystems' products include work at university, government and other non-profit institutions that focus on uncovering the basic laws of nature and understanding human disease. Pharmaceutical and biotechnology companies use Applied Biosystems' products to discover and develop new drugs more effectively.

Pricing and Ordering Information

Account Contacts for Ordering Information:

Rick Naher
Sales Representative
Phone: 1-800-248-0281 x7838
