Fisher Scientific, Inc.
(Preferred Supplier)

Items Offered:
- Scientific supplies, chemicals, equipment and instrumentation

Company info
Fisher Scientific represents a one-stop source for a family of global product and service brands comprising a comprehensive range of laboratory equipment, chemicals, instruments, biological products, and consumable supplies. Fisher Scientific’s extensive list of exclusive alliances with major manufacturers allow them to give customers easy access to the products that are most in demand—all from one supplier. In addition, they also provide a wide array of value-added services including inventory management, supply chain management, third party procurement, chemical management, and laboratory services. At OSU, they bring the best of everything they have to offer via a dedicated Sales & Customer Service Team, daily next-day deliveries, and competitive contract pricing. And with 100% free freight on their entire portfolio, including our third party program, you will always get the best value when you choose Fisher Scientific.

Benefits to OSU
- Fisher Scientific is the preferred supplier for scientific supplies, chemicals, equipment and instrumentation needs at The Ohio State University.
- 100% free freight, no order charges or handling fees
- Next Day Delivery Service from our warehouse in Florence, KY to OSU central receiving
- Very significant package discounts on any new lab start up
- Sustainability programs

Ordering info
- Orders should be placed through eStores.
- Click on “Fisher Scientific” in the eStores Supplier websites listing.

Pricing
- Price savings on every item that is carried.

Shipping
- Items should be shipped to building #381

Affymetrix

**Items Offered:**
- Biological products and related lab supplies

**Company info**
Affymetrix' GeneChip® technology was invented in the late 1980's by a team of scientists led by Stephen P.A. Fodor, PhD. The theory behind their work was revolutionary – a notion that semiconductor manufacturing techniques could be united with advances in combinatorial chemistry to build vast amounts of biological data on a small glass chip. This technology became the basis of a new company, Affymetrix, formed as a division of Affymax, N.V. in 1991. Affymetrix began operating independently in 1992. Headquartered in Santa Clara, California, the Company completed its initial public offering in June 1996. Affymetrix, through internal development and acquisitions, provides innovative technologies that enable multiplex and parallel analysis of biological systems at the cell, protein, and gene level, facilitating the rapid translation of results into biology for a better world.

**Benefits to OSU**
- Free shipping on all orders placed through OSU Molecular Supply Center
- Some discounts are provided on product orders placed through OSU Molecular Supply Center, check with the Supply Center on specific discounts available

**Ordering info**
- Affymetrix offers a hosted catalog in eStores that includes all product categories awarded under the OSU Molecular Supply Center contract. Freight charges do apply on orders placed through eStores.
- Affymetrix is also available through the Molecular Supply Center. Freight charges do not apply on orders placed through the Supply Center but orders must be picked up. The Molecular Supply Center is located in Room 117A of the Biological Sciences building on 12th Ave. Contact the supply Center at mbsc@osu.edu

Allentown, Inc.

**Items Offered:**
- Laboratory Animal Rodent Cages and Racks

**Company info**
In March of 1968, Michael A. Coiro, Sr. founded Allentown Inc. Since then Allentown has asserted itself as an industry leader by supplying products and services of an unmatched quality. Allentown’s longevity can be attributed to its unsurpassed business integrity and putting the needs of their customers first. This corporate culture and partnership with its customers has allowed Allentown to provide the most expertly designed, well-built and longest lasting housing solutions to the Laboratory Animal Science community. Allentown's 200,000 square foot manufacturing facility is fully capable of providing timely, cost-effective solutions for any biomedical research facility. From computer-aided design and development through automated fabrication and welding, Allentown products are manufactured with tight tolerances to precise specifications. Our experienced work force combines craftsmanship with innovation, constantly refining our manufacturing process to insure our customers the highest quality product, at a competitive price.

Corning Life Sciences

Items Offered:
- Cell culture media and consumables, PYREX glassware, molecular biology consumables and food and beverage consumables

Company info
Across their broad portfolio of life science products and brands, the drug discovery industry recognizes Corning for their reliability, innovation, and value in both consumable and non-consumable labware. When it comes to creating cell culture environments, drug researchers find the perfect triple-play in Corning’s innovative vessels, specialized surfaces and media. Their advanced surface technologies and media provide an optimal environment needed for fast, healthy cell growth – and ultimately, successful biologic treatment of a wide range of diseases.

Roche Diagnostics- Applied Science

Items Offered:
- Laboratory and Scientific supplies and equipment

Company info
F. Hoffmann-La Roche Ltd. was founded in 1859 as Boehringer Mannheim, a developer of rare chemicals and pharmaceuticals. In 1896, Fritz Hoffmann-La Roche launched his company as the successor company. The guiding maxim for Fritz Hoffmann-La Roche was to develop and to manufacture novel drugs of uniform strength and quality and to distribute them internationally - a goal still valid today. In the 1950s, the bioreagents product line was developed according to the company’s own needs in diagnostics research. Today, Roche Diagnostics - Applied Science supplies a broad and growing array of instruments and highly specific reagents and test kits for use in the research market and in industrial processes. Its product portfolio and capabilities are especially strong in genomics and cellomics, sciences that are transforming our understanding of disease, with focus on DNA sequencing, microarrays, gene expression, and cell analysis.

Benefits to OSU
- Roche Applied Science will provide The Ohio State University discounted pricing, reduced or waived shipping costs on all orders, extended instrument warranties, and technical customer service.

Ordering info
- Place your order directly through eStores.

Pricing
- See eStores for specific pricing.

Shipping
- Shipping to #381 preferred; some items approved for On-Site Delivery
